18th January 2017

Dear John,

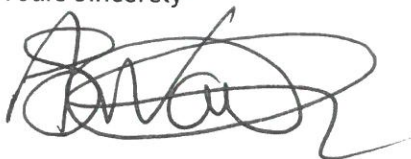

I would like to take this opportunity to thank you and the team at B2B with successfully sourcing finance packages for two of our new investments we made in 2016.

The first, a bespoke picking line for waste segregation and recycling, was difficult due to the complexity of refinancing existing equipment to meet the production payments. This was exacerbated on the back of a de-merger from our parent company Drurys Transport. The innovative solutions that you agreed with the lender enabled a facility to be implemented that provided us with maximum flexibility to aid with cashflow and the VAT requirements. You and your team enabled the process to be pain-free and kept me and our SMT updated at all times.

The most recent cashflow solution was handled in the same proficient way as before and again was not straight forward. However, following the settlement of an outstanding finance agreement for one of the pieces of equipment used in the original re-finance mentioned above, you managed to obtain the funding required with VAT deferral that meet our requirements.

i will be contacting you to discuss future projects regarding funding options for sustained business growth, with the added option of having a critical friend who can question the rationale behind the idea.

Yours Sincerely

Alister S Wait
Director
