To whom it may concern,

I work within Muntons Plc as their Finance Director and B2B Cashflow Solutions were brought to my attention through a contact within RBS. At the time we were seriously struggling with trying to obtain finance for a very exciting project. This was to install an Anaerobic Digester plant and whilst the payback was extremely good, the way that funders were viewing the project and the business, was making the raising of the necessary capital impossible.

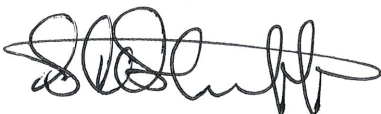

Once I made contact with Nick Flowers at B2B Cash flow Solutions I was very impressed with the speed at which they came in and gained a good understanding of our business model and the funding issue we found ourselves in. Almost from day one, it was like having a Personal Financier whom was very much on our side, professionally scouring the market to gain the level of interest.

Nick took on board all the main strategic points being made and eloquently presented them to key investors. We were kept abreast of the situation at all times even at the most distressing of times when funders were not being very communicative. We were convinced that at all times Muntons requirements were being proactively pursued.

Their involvement continued once a funder had been found through continual liaison and ensuring that we fully understood the implications of what was being presented. The interest shown during the process has continued now the funding is in place with frequent visits to site to understand the progress being made.

I would most definitely recommend Nick and his team at B2B Cashflow Solutions to anyone whom is looking to source the market for capital financing.

Yours faithfully,

Steve Bluff  
Finance Director
